

Bright Sparks Bring Light to East Timor

How a Melbourne group is bringing solar power to the people of East Timor

Information Night, 6.30pm, Tuesday 19 June

East Timor is one of the poorest countries in the world. The situation is highlighted when the sun goes down. In rural areas people prepare and eat their meals using candles or polluting kerosene lamps, the less fortunate simply have the dark.

A small group is taking practical steps to provide solar powered lighting and electricity to the most remote Timorese. Come to an information night to find out

- What projects the group has completed
- How to get involved in the groups work
- How to support rural lighting in Timor

The Alternative Technology Association has been working with communities in East Timor to provide clean renewable light and electricity to orphanages, medical clinics and community centers. An information night is being organized to draw attention to the group's activities. This will be an excellent opportunity to hear about the groups past success and get involved in upcoming activities in East Timor and beyond!

When: 6 for 6.30, Tuesday 19 June
(finish at 8pm)

Where: Upstairs at Level 2/39 Little
Collins Street, Melbourne City

Refreshments will be served including East
Timorese coffee.
